640x480 Resolution

- World's best image quality
- 500:1 measurement spot size – increased accuracy
- Increased user safety – inspect electrical circuits outside the shock boundary
- Highest thermal sensitivity – see thermal problems earlier

Easy To Use

- Touchscreen simplifies inspection data collection
- Lightweight ergonomic design
- Highly intuitive interface reduces learning curve
- Reduces report generation time by up to 90%

Innovative Design

- Unique dual laser target marking system
- Fusing of thermal/visible images
- Integrated route management software option
- Rotating camera head

Affordable Performance

- Application-specific packages offered
- Lowest ownership costs over 5 years
- Upgradeable
- Service contracts available

373 Route 46, Fairfield, NJ 07004
