### See How EZTherm 875 Compares to Competitive Brands

Feature	EZTherm 875	Competitive Model	Benefits
Resolution	160x120 (19,200 pixels)	120x120 (14,400 pixels)	30% more pixels means higher resolution and much better image quality.
Integrated Visible Camera	Optional	Not Offered	Capture visible images for use in reports.
Temperature Range	536°F	482°F	The 875 can be used on a wider range of applications.
Auto Hot/Cold Spot Detection	Yes	Not Offered	Automatically shows the hottest or coldest point in the image.
Condensation Marker	Yes	Not offered	Displays areas of possible condensation.
Display Size	3.5 inch (landscape display)	2.8 inch (portrait display)	Larger display with properly oriented image is easier to read.
Optional Telephoto Lens	9" (3x magnification)	Not offered	Identify and accurately measure problems in equipment further than 10 feet.
PC Software	Full package	"Quick" version	We offer the full professional version of our software.
Warranty	2 years	1 year	Twice the period of protection = piece of mind.
Price	\$2,995*	\$2,995	EZTherm 875 is clearly the better value.

\*With coupon - North American customers only.
